1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the claims:

In claim 1, line 4, "grove" has been changed to --groove--.

2. The following is an examiner's statement of reasons for allowance: the limitations reciting a hand held device including a control member moving along a guide groove to fold an operational member into and out of a side of a handle without a spring as claimed in combination with other limitations set forth in claim 1 are not anticipated or made obvious by the cited prior art. For example, Vallotton teaches a folding knife blade including an actuator arm moving along an actuator slot with assistance from a spring and further teaches first and second connecting formations and positional relationship between the first and second connecting formation when the operational member is in closed or open condition as in the instant application. However, Vallotton fails to teach a hand held device including the control member moving along the guide groove to fold the operational member into and out of the side of the handle without a spring as claimed in combination with other limitations set forth in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
